Preparation for the Study  
 Institutional Review Board  
 Selection Criteria: Sites and Subjects  
 Sample: Sites, Subjects, and Preceptors

This document outlines the process of preparing for a study, including the review by an Institutional Review Board (IRB) and the selection of sites and subjects. The process involves several key steps:

- Preparation for the Study:** This involves identifying potential sites and subjects, and developing a protocol for the study.
- Institutional Review Board (IRB):** The protocol must be reviewed and approved by an IRB to ensure the safety and ethical treatment of subjects.
- Selection Criteria: Sites and Subjects:** Specific criteria are used to select sites and subjects that are appropriate for the study.
- Sample: Sites, Subjects, and Preceptors:** The final sample of sites, subjects, and preceptors is identified and recruited.

The process is detailed and involves multiple steps, including the review of protocols, the selection of sites and subjects, and the recruitment of preceptors. The final sample is used to conduct the study.
